# TRUSTED EXPERTISE

At Allseas Global Logistics we pride ourselves on handling the most challenging, time-critical deliveries and we've built up a wealth of unrivalled expertise to support this.

From door to door, we'll work with you to plan ahead, saving you time and money before your shipment even reaches the starting line. We'll be on hand throughout to deliver safe, swift solutions that respect the environment and bring a global understanding of the logistics world few can match.

Our wealth of in-house expertise has made us a freight forwarder our clients trust to deliver complex shipments faster, safer and more efficiently. True specialists in our field, our logistics network spans the globe and covers land, sea and air. So however complex your cargo, project or challenge, we'll make it seem surprisingly simple.

ONE  
BIG  
GLOBAL  
TEAM

# CONNECTING THE WORLD

**We're far from a virtual operation in an anonymous office. We're real people who love to roll our sleeves up and get stuck in. We work together as one big global team, connecting the world across a wide range of unique facilities.**

## **Solid foundations**

- Our own headquarters and vast logistics centre.
- Strategically located offices in key UK ports plus the Middle East and Asia.
- Carefully selected, trusted partners across the globe.
- Expert logistics advisors, not just order takers.

## **The tools to match**

- Our own flat racks, platforms, open tops and mafis.
- Our own fleet of lifting and loading equipment.
- All the equipment needed for the very best, seamless, door-to-door service.

Of course, global logistics is not just about the physical world. Our Electronic Data Interchange (EDI) software seamlessly integrates with industry standard interfaces and many more applications besides. Giving access to the right information without delay, it can also send and receive bookings, B/L instructions, advanced shipping notices and container status messages. Meanwhile, our own system has an export shipping rates matrix, able to give you a quote in just two hours.

# SERIOUSLY BIG SOLUTIONS

# BREAKBULK & OUT OF GAUGE

**Our abnormal loads service covers all kinds of out of gauge and heavy lift shipments. So much so, we've become a leading specialist in big, complex cargo shipping.**

We're proud to meet our clients' needs, including organising the transportation of Breakbulk and non-containerised cargo, often on-board deep sea container ships.

Many of our people are experienced in working for shipping lines and port operators, giving us a natural advantage over many of our competitors. Put simply, we know what can be done and how best to do it. That's why we work closely with the world's most established shipping lines and ports to plan and organise the loading of Out-of-Gauge and Breakbulk cargo.

We use specialised container equipment such as flat racks, platforms and open top containers, versatile enough to carry the bulk of out of gauge movements. And with a staggering payload capacity of up to 45 tonnes on certain trade lanes, our vast fleet of 40ft flat racks deliver a seamless, reliable service, no matter what the load. So we're not happy simply being a world-renowned freight forwarder. We're fast developing into a leading provider of specialist equipment.

# HEAVY LIFT & CHARTERING

**We love a challenge. So however big, complex or awkward your project cargo, we'll find a way to move it quickly and safely, from one tonne bulk bags to 1600 tonne tandem lifts. In fact, factory relocations and oil or energy projects are something of a speciality.**

Unique challenges demand unique solutions. So our experienced, innovative teams offer unrivalled expertise. Not only moving the most difficult, challenging and time-critical cargo, but providing perfectly matched shipping solutions.

From huge generators, heavyweight components and transportation, to processing equipment and entire factories – we transport it all across the globe. Our in-depth market

knowledge and relationships across the shipping industry are second to none. Meaning we can identify and charter the vessel space to fit your needs and arrange safe loading, securing and unloading of the cargo.

We're strong in chartering too – operating high volume charter services to and from Europe, Africa and the Middle East. Our vessels can be chartered per trip, or on a time chartered basis, from short sea to deep sea movements.

Working closely with carefully selected partners in strategic markets, we deliver safe, swift solutions that respect the environment. With Allseas experts on the spot to supervise and control the process from start finish, we're the only sea freight forwarder you need.

# CONTAINERISED FREIGHT

With weekly global departures and service contracts with every major carrier, we'll make sure your cargo is moved on time and on budget. So whether it's transit time or price-critical, we're confident of providing the best containerised solution for your freight.

Thanks to our NVOCC contracts with major shipping lines, we offer weekly Full Container Load (FCL) services to most destinations around the world, including General Purpose, High Cube, Flat Rack, Open Top, Platform and Refrigerated containers.

Should you need to send less than container load shipments (LCL), we receive continuous shipments

at our Aberdeen, Birmingham, London (East and West), Leeds and Manchester depots. We also offer regular, dedicated LCL services to all global destinations and freight forwarding services to some of the toughest to reach parts of the world. So if you're looking to cut down costs and delivery times, look no further.

ULTIMATE  
BLUE SKY  
THINKING

# AIR FREIGHT

We've been developing our air freight experience for more than 10 years now, building great relationships with international carriers around the world. We've also honed our customer experience to perfection through our air division, offering a full, market-leading logistics package. All delivered by industry experts and supported by transparent, leading-edge information management.

## Export

Our commercial contracts and buying power with all the major Airlines and GST Agents means we can negotiate the most competitive rates for your export cargo. Through our global network partnerships we offer the very best ground agents for efficiency on cost effective solutions.

## Import

Our global network currently has more than 600 trusted agents, for the most flexible, competitive rates worldwide and maximum neutrality. We also offer cross trade point-to-point, along with ERTS bonded warehouse at all major UK airports for goods in transit. Better still, our Air Courier service offers a wide range of standard and bespoke UK and International services, whatever your needs, whatever your industry.

## World-class service, worldwide

- Wide range of time-defined and specialist services
- All cargo shipment types, from express courier and hand deliveries to heavy lift and air charter
- Choice of standard connections and fixed schedules
- Air freight charters, arranged to fit your exact needs
- Renowned trade buying rates for competitive pricing
- Door-to-door services to any destination in the world.

# DYNAMIC RESOURCING

At Allseas Global Supply Chain we understand that our clients are unique and we pride ourselves on listening to their requirements, so that we can provide an individually tailored solution meeting our client's needs.

We can offer services across the entire supply chain from initial product manufacturing through to end delivery. We offer a fully integrated, end-to-end service designed to create value across a broad range of industry sectors and all modes of transport.

- **Design** – we provide individual tailored programmes for our clients, with strategic network planning tested in a safe environment prior to implementation. Competitive advantage ensured through the harnessing of Allseas scale and access to a worldwide network of partners.

- **Manage and Simplify** – we enable visibility to our clients through one cockpit, managing the patchwork of data and documents, customs, duty and tax, reporting, risk analysis and avoidance.
- **Operate** – we deliver operational excellence that keeps clients in the driving seat, sourcing best in class 3PL operations, including order management, transport planning, booking and invoice verification.
- **Continuously Improve** – operating in a joint-value environment, we work to clearly defined efficiency and service improvement targets, striving for shared innovation whilst providing access to Allseas logistics expertise.

## Dynamic Resourcing

Our Dynamic Resourcing service is exclusive to Allseas Global Supply Chain clients. Dynamic resourcing is the smart word for a “Plug and Play” resource solution. It allows for intelligent resource to be instantly embedded into your organisation.

Our partnership carries no bias to any particular provider, our specialists assimilate into clients' businesses, vigorously protecting their interests, focusing only on business growth at the most competitive price.

### Key benefits

- **Minimises cost** – Our first approach is always to minimise financial exposure for a client, with FTE generally one of the highest areas of cost in any business.
- **Supports project delivery** – When delivering a change management programme, Dynamic Resourcing helps to keep up the momentum of project delivery within timeline, quickly bringing skilled individuals to an area requiring improvement.
- **Avoids employment costs** – Dynamic Resourcing delivers a fast and intelligent solution without the client needing to employ FTE with the associated costs of healthcare programmes, screening, agency fees and such.
- **Flexible and scalable** – The Dynamic Resourcing team are only in place as long as required and if the client wishes to keep the individuals post-project, they are welcome to employ them at a cost far below market rate.
